EXAMINER'S AMENDMENT

Central Fax

On July 15, 2005, the Central FAX Number will change to **571-273-8300**.

Most facsimile-transmitted patent application related correspondence is required to be sent to the Central FAX Number. To give customers time to adjust to the new Central FAX Number, faxes sent to the old number (703-872-9306) will be routed to the new number until September 15,

2005. (Note that since this new number is already operational, customers can use either number until September 15)

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joel Harris (Reg. No. 44,743) on 8/4/2005.

Art Unit: 3739

The application has been amended as follows:

Please amend the specification in the following manner:

- page 1, line 16, change “10/982,482” to --09/982,482--,
- page 1, line 17, change “*Energy Delivery* and Serial No.” to -- *Energy Delivery* now abandoned and Serial No.--,
- page 1, line 18, change “(Docket No. SRX-011) titled” to --(Docket No. SRX-011), now issued as U.S. Patent 6,929,644 and titled--.
- page 3, line 2, change “would desirable” to -- would be desirable--,
- page 4, line 12, delete “be”,
- page 10, line 21, change “illustrates that shows that” to -- illustrates that--.

Additionally, please amend line 1 of claim 20, such that “The working end of claim 1” is changed to -- The working end of claim 13--.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art, individually and collectively does not disclose, imply, suggest and/or teach providing a device having an interior conductor surrounded by an insulator, wherein the insulator has an exterior surface that may contact tissue and one or more conductive elements extend from the exterior surface of the insulator to the interior conductor and the insulator and conductive elements are configured such that the thermal expansion of the insulator is greater than the one or more conductive elements and together act as the thermally activated electrical switch. It should be noted that the insulator may alternatively be a partially conductive material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Election/Restrictions

The previous office action requiring an election of a single species was improper in light of the allowability of the generic claims 1 and 13. However, the allowability of the generic claims was only determined after a thorough search and examination were conducted.
